Hej småles!

It is really crazy how time flies by so fast! Can you believe that 9 months have gone by already? We hope you've enjoyed learning new things with us every season. In this issue, we are really interested to learn more about an ancient type of animal which roamed the earth millions of years ago.

Can you guess what it is? Join us on page 6, to travel back in time and learn more about these creatures!

With Big Bug hugs,
Sara

Important notice

Hej småles,

As part of our precautionary measures,
the Bug House will continue to remain
close until further notice.

New småles registration, passport
replacement and merchandise
redemption will not be possible
throughout this time. Check out your
nearest IKEA store's operating hours
and others information at [IKEA.my/stores](https://www.ikea.my/stores).

Thank you for your patience.

Stay safe and healthy!

Colour me

What is a dinosaur?

Dinosaurs are a group of reptiles that used to roam the earth during the Mesozoic Era (66 - 245 million years ago).

Spinosaurus

Microraptor

They come in a lot of different shapes and sizes, from the fearsome giant Spinosaurus to the chicken-sized Microraptor.

Some dinosaurs were carnivores, some herbivores and some omnivores.

Ankylosaurus

Tyrannosaurus rex

Hypsilophodon

The time when dinosaurs lived can be broken down into 3 periods: the Triassic, the Jurassic and the Cretaceous.

During each period, the land kept splitting from one huge piece into smaller ones. The changes in their homes, climate and food sources affected how dinosaurs lived throughout the different periods.

Triassic period
200 million years ago

Jurassic period
150 million years ago

Cretaceous period
65 million years ago

Over the years, the number of dinosaurs became fewer but it was a disastrous event that wiped out the whole species. Studies say that it could have been an asteroid impact but whatever it was, the loss of the dinosaurs left gaps in the world's environment.

Types of dinosaurs

Dinosaurs can be divided into two main types by the shape of their hip structure. The first group called Saurischia, has a hip structure like lizards.

Saurischia

Spinosaurus

Tyrannosaurus rex

Brontosaurus

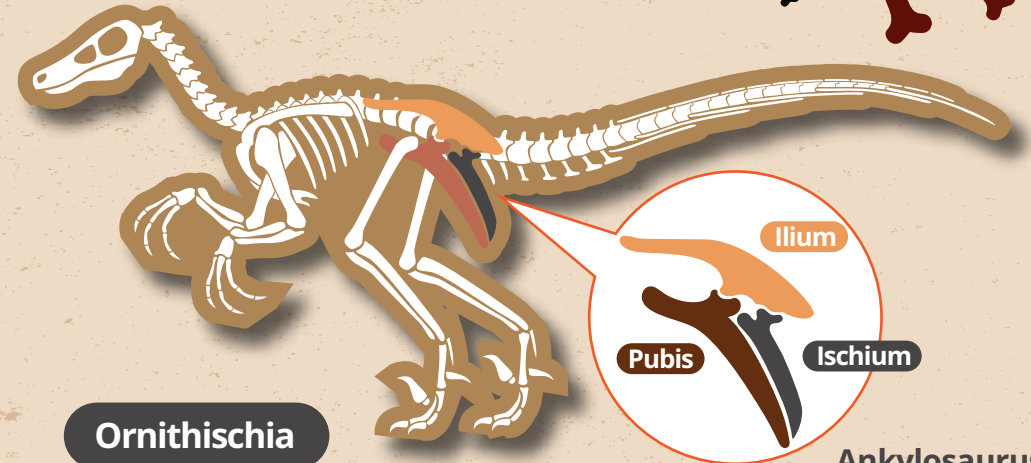

Diplodocus

Velociraptor

The second group, called Ornithischia, are those with a hip structure more like birds.

Ornithischia

Ankylosaurus

Stegosaurus

Triceratops

Parasaurolophus

Iguanodon

10 cool facts about dinosaurs

1

The word dinosaur comes from the Greek language and means 'terrible lizard'.

2

The first dinosaur to be formally named was the Megalosaurus, back in 1824.

3

Even though dinosaurs were reptiles, some of them were warm-blooded.

4

The vast majority of dinosaurs were herbivores (plant eaters).

5

Although a Stegosaurus body was large, the size of their brain was about the size of a walnut.

6

The largest dinosaurs such as the Brachiosaurus and Apatosaurus were actually herbivores (plant eaters) and not carnivores (meat eaters).

7

Tyrannosaurus had a set of 50-60 banana-sized teeth!

8

Birds descended from a type of dinosaurs known as theropods.

9

The skull of a Triceratops alone could grow over 2m in length.

10

Pterodactyls are flying reptiles which lived during the age of dinosaurs.

Extinction today

What is extinction? It is when a certain animal or plant no longer exist. Naturally, Extinction happen over time, more than 90 percent of all organisms that used to live on Earth millions of years ago, now aren't alive today, like the dinosaurs.

However, this natural process has also been sped up by us humans, due to the role we play in overfishing, overhunting, habitat invasion and more. Animals like the West African Black Rhino recently became extinct while the Sumatran orangutans and plants like the American chestnut trees are critically endangered.

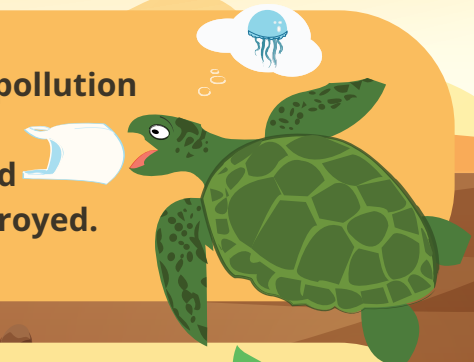

How we can help prevent it

Fortunately, an animal or plant that is considered endangered, still has a chance to survive. If we play our parts, we can help protect and restore their habitats. Here are some ways:

Learn more on the subject.
An educated mind is one that will make the biggest difference to prevent extinction.

Reduce the amount of trash and pollution that we cause, so that animals would not mistaken them for food and their homes will not get destroyed.

Support organisations that are working to help endangered species and other wildlife parks.

Support companies that have good ethics and practice sustainability.

INBOX @ SMALES

Last issue's theme:
Sara and Bugbug are taking part in this year's pumpkin craving competition. The theme is Thanksgiving, how do you think the pumpkin turned out?

Aisyah Ayuni, 12 years old

Lam Heng Yu, 8 years old

Best Letter

One day Sara was reading the newspaper when she shouted: "Hey Bugbug! There is going to be a shooting star tonight!!! Shall we go stargazing tonight?" Bugbug replied "Of course! Why not? Let's invite our friends!" So they went to tell their friends to come to Happy Hill to stargaze. All of their friends said that they will come. At 10:00pm all of them were eating barbecued tomato and sausages on Happy Hill. While eating, they saw a bright shooting star. Then Bugbug said "There's another big shooting star next to it!" BAM! The big shooting star crashed at Lonely Forest. Everyone ran towards the place where the shooting star landed. When they all got there, they gasped. IT WAS A UFO! There were 2 aliens in it. "Hello?" said Sara nervously. "olleh! Ohw era uoy?" said the alien smiling. "What is he saying?" whispered Tony Tomato. "I think he is saying backwards!" said Clever Carrot. "He is saying hello, who are you!!!" "sey!" said the aliens together in unison. "ew era sneila morf retipuj." "He says they are both from Planet Jupiter. Cool eh?" translated Clever Carrot. Sara, Bugbug, Tony Tomato and Clever Carrot brought the aliens to eat Smales Ice-cream and other delicious food. The aliens were impressed and marvelled by the food's tastiness. After they finished eating, they helped the alien's repair their damaged UFO and said goodbye to their new friends, the aliens as they flew back home into the starry night sky. After that everyone went to Happy Hill and star gazed while drinking delicious hot chocolate. Everyone was very happy!

Ho Kai Xin, 12 years old

Last issue's theme:
Sara and Bugbug are lying in the field, stargazing one night. Out of nowhere, they see something shoot across the sky. What do you think it is?

One windy night, Sara and Bugbug was lying in the field just to look at the mesmerizing stars. Suddenly, they saw something across the sky. They were wondering what could it be, so they followed the 'thing' until it landed. For their surprise, it was a blue hedgehog wearing white and red shoes.

Sara: Excuse me, but who are you? Can you understand me? My name is Sara and this is Bugbug.

The Hedgehog: Of course, I understand. My name is Sonic the hedgehog. Nice to meet you. I was going on a world tour, but I think m lost. Can you guide me?

Sara and Bugbug showed him all the beautiful scenery they got in their village. They even meet him to some of their friends. Sonic took so many pictures for the great moments.

Sara: Here try some of my newspaper porridge.

Sonic: Err... Thanks? *takes a sip* Wow, this is more delicious than I thought. *finish it with a great appetite* Haven't I show you my super powers yet.

Bugbug: Nope.

Sonic began to run so fast. Faster than a lightning.

Sara and Bugbug: WOOAAAH!!!

Suddenly, a bus arrived and a pink red dressed hedgehog came out.

Amy: Sonic I've been searching for you, and here is where you end up. There's no time to waste we need to go.

Sonic: Oh right. Sara, Bugbug, I'm sorry I can't introduce her a lot more cause I got to go. Thanks for the tour guide.

Sara: No problem. But will we ever meet again?

Sonic: You bet. Bye Bye *gets on the bus*

Sara and Bugbug: Bye Bye Sonic!

Rayyan Rafiqi Bin Yusaini, 10 years old

It's finally time for Sara and Bugbug to decorate their Christmas tree! How do you think it turned out?

Include your name, age, Smålish passport number and address, and send your drawing to sara@smales.com.my or **smales, No 2, Jalan PJU 7/2, Mutiara Damansara, 47800 Petaling Jaya, Selangor** by **23 October 2020**. 2 lucky winners will each win a **JÄTTELIK Soft toy**, dinosaur/triceratops.

Every year, under the Christmas tree, there will be a present for Sara and Bugbug each. However, this year there is an extra present with no name on it. What do you think is inside the present and who left it there?

Include your name, age, Smålish passport number and address, and send your letter to sara@smales.com.my or **smales, No 2, Jalan PJU 7/2, Mutiara Damansara, 47800 Petaling Jaya, Selangor** by **23 October 2020**. 2 lucky winners will each win a **JÄTTELIK Soft toy**, dinosaur/stegosaurus.
